

Write log - EU-HF Championship Contest database

Updated: July 24, 2024

ZIP file contains 2 files:

- "wl_euhfc_history.ad" (EUHF Contest "Preset Exchange" - ADIF file with callsigns and last two digits of the year of operator's first ever official amateur radio license)
- "README.pdf" file (this help file)

How to load the file into Writelog:

- open new contest in WL
- select "EU HF Contest", if you don't see "EU HF Contest" listed please install EU HF module first from here: <https://s5cc.eu/download/wl-euhf.zip>
- go to "Contest" menu, select "Parameter setup...", fill in your 2-digit license year and select category
- navigate to "Tools" / "Preset Exchange from ADIF file" and import downloaded ADIF "wl_euhfc_history.ad", select at least "NR" for preset and press OK
- wait and you will get pop-up window - "xxxxx calls loaded"
- save your log first and you are ready to go (test familiar call and year should fill from the preset)

Just remember! Log what you heard, not what a database tells you that you might have heard. If you didn't hear it, don't log it. Exchange guessing feature is not a replacement for your ears!
